In any tourist spot of Bangladesh people sometime don't know about the main attract or hotel and restaurant nearby. Sometime they also don't have any idea about how to go through the place. In many situation people miss the main attract of the place or got scamed by the local taxi drivers. To solve this type problem we have chosen the topic "TOURIST GUIDE". When the user visit any division of Bangladesh the software will show the historical places and sight seeing places. If the user visit to the historical place the app will show all the details like-stablished year or other details. The app will also have an option to show nearby hotels, restaurants and other shops. In another option user can go for the main attract of the place. Sometimes people don't know about the main attract of the place or some other beautiful sight of the place. For this option user should be purchase for premium with a little amount of money. As the human guide of some places are too expensive so people can use it as a cheap price with lot of facilities
